Check the box to confirm that a clear photo of the **ASME** rating plate is attached to this report:

Check the box to confirm the **ASME** rating plate has been removed from the heat exchanger and destroyed:

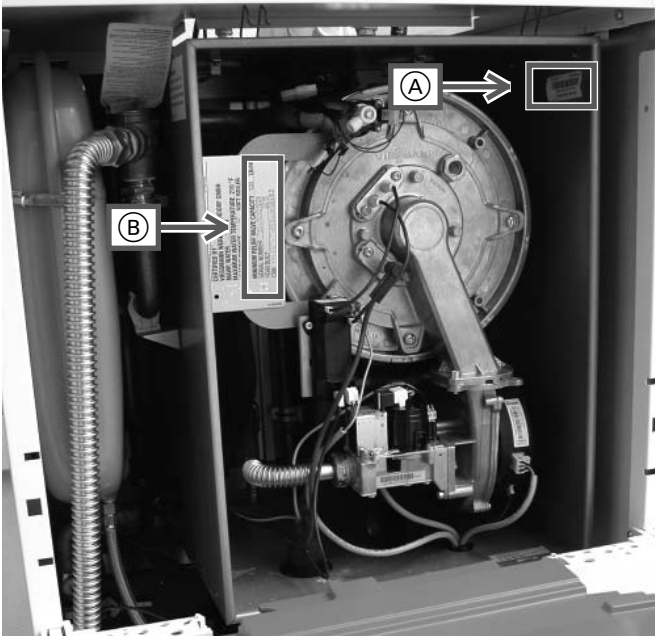

Vitodens 200-W, B2HB Serial Number Locations

The 16-digit boiler serial number (A), is located on the lower left hand side of the boiler (front white cover must be removed).

The 12-digit heat exchanger serial number (B), is indicated on the metal rating plate located on the front left hand side of the boiler (front white cover must be removed).

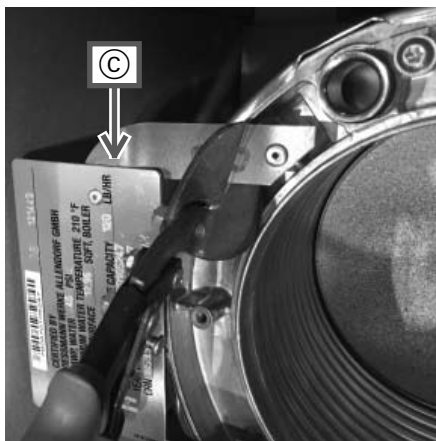

Vitodens 222-F, B2TB Serial Number Locations

The 16-digit boiler serial number (A), is located on the top right hand side of the boiler (front white cover and inside boiler cover must be removed).

The 12-digit heat exchanger serial number (B), is indicated on the metal rating plate located on the front left hand side of the boiler (front white cover and inside boiler cover must be removed).

IMPORTANT

Submit a clear photo of this ASME rating plate along with this report.

Vitodens ASME Rating Plate Removal

Using tin snips, remove the ASME rating plate (C) from the heat exchanger. Upon removal cut the rating plate into two pieces.
