

PRESS RELEASE

Vitocell 300-W, EVIA – the newest addition to the Vitocell 300 line of domestic hot water storage tanks

The Vitocell 300-W, EVIA is the newest addition to our Vitocell 300 line of indirect-fired domestic hot water storage tanks. With its vertical design, 160 liter (42 USG) storage capacity and white enclosure finish, this new tank aesthetically matches perfectly with our current Vitodens 100-W and small size Vitodens 200-W wall-mounted condensing boilers.

The Vitocell 300-W, EVIA tank features large heat exchanger surfaces for fast recovery rates to provide a constant and reliable domestic hot water supply. Additionally, the foamed-in-place HCFC-free insulation minimizes standby losses and operating cost.

Made of high-alloy SA 240-316Ti stainless steel, the Vitocell 300-W, EVIA is not only hygienic, but also offers reliable performance and a long service life. Furthermore, the tank is ideal for areas with poor water quality due to its scale and corrosion resistance.

This top quality tank is backed by a Viessmann LIFETIME WARRANTY on the heat exchanger and tank for residential installations.

About Viessmann

The Viessmann Group is one of the world's leading manufacturers of heating and renewable energy systems. Family-owned since 1917, Viessmann has set standards and continues to do so with innovative heating solutions that provide ultimate comfort, conserve energy and keep environmental impact to a minimum. The group today employs over 11,500 employees worldwide with a
