## **Viessmann Vitodens 222-F, B2TB Boasts Simplified Installation and Newly Included Piping Kit**

The Vitodens 222-F is a high-efficiency space heating, DHW production and hot water storage system - all-in-one single-footprint unit. With a complete side-piping kit, the 222-F offers quick and easy installation, thanks to pre-installed pressure and temperature relief valves, a fully enclosed heating expansion tank, and built-in 3-speed DHW and space heating pump with diverter valve.

Previously, piping kits were sold as add-on items for the B2TB. After performing field surveys, Viessmann has decided to include a complete side-piping kit with every Vitodens 222-F to further simplify an already quick and easy installation, cutting down on labor time and reducing costs.

The Vitodens 222-F is the most complete solution for residential heating and DHW, combining a highly efficient (95% AFUE) gas condensing boiler with integrated 26 Gallon titanium-stabilized stainless steel DHW storage and instantaneous performance into one floor-standing unit.

Its unique, all-in-one design offers the benefits of a boiler and standalone DHW tank, but requires only a small footprint and offers convenient installation. With rated input of 12-125 MBH and offering a 6 GPM DHW flow rate\* along with effective and efficient space heating, the 222-F is ideal for most residential applications.

Other features of the Vitodens 222-F include:

- leveling feet for easy set-up in basement boiler rooms
- zero clearance to combustibles
- Vitodens 200 Series control with easy-to-use Startup Wizard
- multiple venting options, with up to 200 feet of combined length venting (refer to install guide)
- consistent DHW delivery with reduced temperature fluctuation and cycle times
- Lambda Pro Intelligent combustion system
- 26 gallon titanium-stabilized stainless steel storage tank with a lifetime warranty to original owner (refer to product warranty for details)
- ViCare capability for remote access via ViCare App (optional)

The Vitodens 222-F, with included left or right side piping kit, is available from Viessmann wholesalers nationwide.

### **About Viessmann**

The Viessmann Group is one of the world's leading manufacturers of heating and renewable energy systems. Fourth generation family-owned since 1917, Viessmann has set standards and continues to do so with innovative heating solutions that provide ultimate comfort, conserve energy and keep environmental impact to a minimum. The group today employs over 12,000 employees worldwide with a turnover of approx. 2.37 billion Euro. Our 23 manufacturing facilities in 12 countries, sales & distribution facilities in Germany and 74 other countries, and 120 sales offices worldwide provide customer proximity and a strong global presence.

Please contact your local Viessmann representative regarding availability. [Learn more about the Vitodens 222-F on our website.](#)
