

Press Release

Vitodens 100-W: Better Than Ever in 2017

April 2017

Celebrate Viessmann's 100 year anniversary with the better than ever Vitodens 100-W gas-fired condensing boiler, now available as heating only (B1HA models) and as Combi boiler (B1KA model) with built-in, on-demand domestic hot water capability. The Vitodens 100-W wall mount boiler is easy to install, service, and maintain for the life of the heating system.

Highlights:

- Ideal for any home and any budget with high performance and value pricing. Compact design allows for installation virtually anywhere
- Now available with greater 6:1 turndown range for natural gas: 21 to 125 MBH
- 95% AFUE efficiency rating on all models makes this boiler eligible for local utility rebate programs
- LCD touch screen menu for system control and easy programming
- B1HA model has domestic hot water priority and sensor for use with indirect water heater
- 5 piping outlets underneath:
 - cold water input / indirect water heater return
 - hot water outlet / indirect water heater supply
 - boiler supply
 - boiler return
 - gas input
- Conveniently located easy-wired TT connection
- Lasting performance with proven Viessmann stainless steel Inox-Radial heat exchanger
- Low emission combustion with fully modulating Viessmann stainless steel MatriX cylinder burner for natural gas or propane; factory calibrated
- Easy access to connect an outdoor sensor. Allows the boiler to run on an outdoor reset schedule
- Easy access to all components of burner, heating pump, plate and frame heat exchanger
- The unit is powered by a 120 volt electrical plug
- Limited lifetime warranty on Inox-Radial heat exchanger in residential applications
- Limited 5-year parts warranty in residential applications
